I'm a web developer with 3 years experience successfully delivering results for small to medium sized companies. Skilled at developing complete web applications from scratch and integrating small apps with larger legacy systems, I deliver quality and maintainable code quickly and consistently.

I have effectively taken large legacy table based sites and migrated them to responsive design using modern tooling while working with product owners to stay under-budget and on-time working with extremely tight deadlines.

As a maintainer of the largest grid framework for PostCSS, LostGrid, I also have had the privilege of working with and learning from amazing developers from all over the globe every single day. I am a strong team player and am experienced in-office and remote.

## Key Skills

- Extremely skilled in producing maintainable CSS using vanilla or pre-processors.
- Outstanding ability to write vanilla JavaScript or using libraries such as jQuery, and writing ES2015 along with writing against linters and TDD.
- Well versed in modern HTML with the ability to write extremely maintainable markup.
- Ability to write Ember.JS and integrate it within none-Ember codebases.
- Experienced with leading and participating in both Waterfall and Agile methodologies.
- Skilled at keeping cool under stressful situations learned from my many outage recovery war stories.
  - Proven skills in reducing outages situations and improving reliability of codebases using improved planning, linting, test-driven development, and overall quality improvements.
- Open to rapid and fast paced changes with constantly evolving business targets and web toolsets.

## Languages and Tools

HTML

Pug (Jade), Jekyll/Liquid, Handlebars

CSS

SCSS, Less, Stylus, PostCSS

Javascript

ES2015, jQuery, Ember.JS, Angular 1.x Mocha

Tools

Jenkins CI, Travis CI, Git, GitHub, BitBucket, GitLab, Gulp, npm

## Work Experience
